EDUCATION

Undergraduate 4th year Software Engineering student

Addis Ababa Science And Technology University.

- Relevant coursework: Introduction to machine learning, Internet Programming, Database Systems, Object-Oriented Programming, Operating Systems, Data Structures and Algorithms.
- I contributed to research and collaborative project centered on scalable web architectures and advanced algorithmic problem solving.

PROFESSIONAL EXPERIENCE

SHECODES

- I Completed a React course through a campus-based SheCodes mentor team in collaboration with GDG.
- I am currently serving as a **React mentor at SheCodes**, where I guide and support students through project-based learning in component architecture, hooks, routing, and best practices for scalable React applications.

GDG

- Led frontend development team using React and coordinated a team of five developers on a capstone project, as well as more than 10 developers during a hackathon.
- Implemented client-side routing, state management, and REST API integration for dynamic data handling. Developed modular, reusable UI components and integrated APIs to create dynamic and responsive user interfaces.
- **Ensured timely project completion** through effective team collaboration and innovation, and achieved a good result.

PROJECTS

Rebel Rover Travel website 📁

- I contributed as a React frontend developer on a GDG travel website project by building reusable components and responsive user interfaces through hands on learning.
- I led the frontend team, coordinating tasks, reviewing code, and ensuring consistent implementation across the project.
- I integrated APIs, managed client-side routing and state, and optimized the UI for performance and usability.

MyPoetry. 📁

- I built a personal, fully responsive website to publish original writings, focusing on clean UI, readability, component based implementation architecture, reusable UI elements. and modern frontend practices.
- I Applied responsive design principles, semantic HTML, and optimized styling for cross-device compatibility and readability.

Resilian 📁

- I'm leading frontend development for a women-focused platform in collaboration with a backend developer which is a friend of mine.
- I designed the UI architecture, contributed feature ideas, and coordinated overall project progress.

Ripple up website 📁

- Built dynamic frontend interfaces for a service-booking platform using React, integrating REST APIs from a Django backend.
- Managed client-side routing, state handling, and modular component design while leading task distribution and code reviews. Led the team by coordinating tasks, guiding implementation, and ensuring timely project delivery.

SKILLS

Programming languages

Python | HTML | CSS | JavaScript | TypeScript | Java | C++ (Intermediate)

Frameworks and Libraries

React.js | Next.js | Tailwind CSS | Node.js | Express | Django

Databases

MySQL | MongoDB

Core Skills

Git | REST APIs | Problem Solving | Basic Data Handling | Introductory Machine Learning Concepts
